Lorentz Solar Pump

LORENTZ technology uses the power of the sun to pump water, sustaining and enhancing the life of millions of people, their livestock and crops. This is encompassed in our company strapline – Sun. Water. Life.

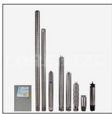

Founded in Germany during 1993 LORENTZ has pioneered, innovated and excelled in the engineering and manufacturing of solar powered water pumping. We design, develop and manufacture the widest range of solar pumps of any company. Mechanical, electronic and software design is all in-house with a specialized team that have been working in solar pumping for 20 years. Our design activities are focused in our Global Headquarters and Technology Center just outside of Hamburg, Germany.

Lorentz COMPASS Software

In order to ensure sound design for every system, Lorentz uses a proprietary system sizing software which utilizes NASA meteorological data to provide accurate output forecast, including seasonal variation caused by changing weather.

Lorentz Solar Powered Pump Types:

Solar Submersible Pumps for drinking & irrigation

Solar Surface Pumps for drinking and irrigation

Solar Pool Pumps for pool filtration

Solar Boost pumps for high pressure applications
